THE NEW ZEALAND

JOURNAL OF AGRICULTURE.

VOLUME 51.

(July–December, 1935.)

INDEX.

A.

Agricultural legislation of 1934–35, 237.
Agronomy Section, 32.
Analysis, soil, the role of, 60.
Answers to inquiries, 126, 190, 253, 318, 382.
Aphides affecting cultivated plants, 26, 92, 214.
Apiary (monthly notes), 55, 120, 184, 248, 312, 376.
Apple, aphides of, 26.
Application of orchard sprays: The stationary system, 321.
Aston, B. C.—
  Live-stock poisoning in New Zealand, 43.
  Supplies of pampas-grass, 46.
Auckland Province, farming in the, 1, 69, 334.

B.

Baled hay, storage of, 382.
Barberry, seedless, in Southland, 190.
Bean, aphides of, 92.
Bell, J. E. — Swamp-pastures of the Lower Waikato Basin, 129.
Bloat in cows, 238.
Blue lupins, sore-shin of, 86.
Brien, R. M.—
  See Neill, J. C., and Brien, R. M.
  Three fungi causing brown-patch of lawns in New Zealand, 157.
"Brown-patch" of lawns in New Zealand, three fungi causing, 157.
Butter and cheese, grading of export, 170.

C.

Calder, R. A.—See Hadfield, J. W., and Calder, R. A.
Canterbury experience with subterranean clover, 167.
Cereals, dry-dusting of, 367.
Certification of seed potatoes, 61, 109, 173.
Certification, seed: Summary of operations for 1934–35, 283.
Certified seed potatoes, identification and purchase of, 107.
Chamberlain, E. E.—
  Corticium-disease of potatoes, 287.
  Sore-shin of blue lupins, 86.
Cheese, grading of export butter and, 170.
Chewings fescue seed, 40.
Chrysanthemums, eelworm disease of, 219.
Citrus-culture (monthly notes), 51, 116, 180, 243, 308, 372.
Claridge, J. H.—
  Seed certification: Summary of operations, 1934–35, 283.
  The identification and purchase of certified seed potatoes, 107.
Clover, Canterbury experience with subterranean, 167.
Clover, cyanoglucosides in white, 159.
Cob-rot of maize, pink, experiments on control of, 65.
Concrete silo, waste in, 253.
Connell, R. P.—The Farm (monthly notes), 47, 112, 175, 239, 304, 369.
Contamination of milk, tests for, 318.
Control measures against worms in sheep, 101.
Corticium-disease of potatoes, 287.
Cottier, W.—
  Aphides affecting cultivated plants, 26, 92, 214.
  See Reid, W. D., and Cottier, W.
Cough in hoggets, 253.
Cows, bloat in, 238.
Cream, creosote and flavour of, 126.
Crop competitions, Southland, 165.
Cussen, C. J. C. — Poultry-keeping (monthly notes), 53, 118, 182, 246, 310, 374.
Cyanoglucosides in white clover, 159.

D.

Dairy-herd testing in New Zealand: Review of the 1934–35 season, 294.
Dairying regulations, recent amendments to, 301.

Dallas, W. K.—
Effect of liming lemon-trees at Tauranga, 163.
Lemon-culture, 193, 275, 342.
Lemon manurial experiment at Tauranga, 97.
Doak, B. W.—Cyanoglucosides in white clover, 159.
Dominion Meteorological Office—Weather records (monthly), 63, 127, 191, 255, 319, 383.
Dry, F. W.—The early progress of the Romney lamb and features in the development of the fleece, 229.
Dry-dusting of cereals: An efficient home-constructed plant, 367.

E.

Early progress of the Romney lamb and features in the development of the fleece, the, 229.
Earp, E. A.—The Apiary (monthly notes), 55, 120, 184, 248, 312, 376.
Eelworm disease of chrysanthemums, 219.
Effect of liming lemon-trees at Tauranga, 163.
Elliott, A. G.—The North Taranaki pasture competition, 144.
Estimates of the season's lambing, 381.
Everett, P.—The Orchard (monthly notes), 51, 116.
Ewes in spring, special feed for, 318.
Experiments on the control of pink cob-rot of maize, 65.

F.

Farm, the (seasonal notes), 47, 112, 175, 239, 304, 369.
Farmers' field competitions, Wellington District: Season 1934–35, 354.
Farming in the Auckland Province, 1, 69, 334.
Feed for ewes in spring, special, 318.
Fescue seed, Chewings, 40.
Fields Division—Certification of seed potatoes, 61, 109, 173.
Foot-troubles in sheep, 190.
Franklin, M. C.—The lime-requirements of sheep, 257.
Fungi causing "brown-patch" of lawns in New Zealand, three, 157.

G.

Garden-pea varieties, 32.
Geese, mortality in, 190.
Germination of newly harvested Algerian oats, observations on, 361.
Germination of perennial rye-grass in the soil and in the laboratory, the, 224.
Gill, D. A.—
Control measures against worms in sheep, 101.
Hydatids: From a veterinary officer's viewpoint, 350.
Grading of export butter and cheese, 170.
Growths on skin of heifers, treatment of, 318.

H.

Hadfield, J. W., and Calder, R. A.—Swede and turnip varieties, 150, 201, 266.
Hamilton, R. G.—The Orchard (monthly notes), 180, 243, 308, 372.
Hay, storage of baled, 382.
Hewlett, C. H.—See Neave, H., and Hewlett, C. H.
Hoggets, cough in, 253.
Hopkirk, C. S. M.—Staggers in live-stock, 18.
Horses, wheat-grain for, 253.
Horticulture (monthly notes), 57, 122, 187, 249, 314, 377.
Hydatids: From a veterinary officer's viewpoint, 350.
Hyde, E. O. C.—
Chewings fescue seed, 40.
Observations on the germination of newly harvested Algerian oats, 361.
The germination of perennial rye-grass in the soil and in the laboratory, 224.
Hyde, W. C.—Horticulture (monthly notes), 57, 122, 187, 249, 314, 377.

I.

Inventions of agricultural interest, 60, 108, 162, 228, 360.

L.

Lambing estimates, North Island, 317.
Lambing, estimates of the season's, 381.
Lamont, N.—See McCulloch, W. J., and Lamont, N.
Legislation of 1934–35, agricultural, 237.
Lemon-culture, 193, 275, 342.
Lemon manurial experiment at Tauranga, 97.
Lime-requirements of sheep, the, 257.
Liming lemon-trees at Tauranga, the effect of, 163.
Liver, abnormal, in pullet, 126.
Live-stock Division—Estimates of the season's lambing, 381.
Live-stock poisoning in New Zealand, 43.
Live-stock, staggers in, 18.
Lupins, blue, sore-shin of, 86.

M.

McCulloch, W. J., and Lamont, N.—Farmers' field competitions, Wellington District, season 1934–35, 354.
McIlwaine, J. E.—Some causes of rejection of pig carcasses, 209.
Maize, experiments on the control of pink cob-rot of, 65.
Milk, tests for contamination of, 318.
Morrison, A. E.—
Agricultural legislation of 1934–35, 237.
Recent amendments to dairying regulations, 301.
Mortality in geese, 190.
Mould-growth on box-timber, prevention of, 22.
Muggeridge, J.—
The white butterfly menace, 109.
Thrips: With special reference to the greenhouse thrips, 298.

N.

Neave, H., and Hewlett, C. H.—Canterbury experience with subterranean clover, 167.
Neill, J. C.—Prevention of mould-growth on box-timber, 22.
Neill, J. C., and Brien, R. M.—Experiments on the control of pink cob-rot of maize, 65.
North Island lambing estimate, 317.
North Taranaki pasture competition, the, 144.

O.

Oats, observations on the germination of newly harvested Algerian, 361.
Observations on the germination of newly harvested Algerian oats, 361.
Official Seed-testing Station: Operations for 1934, 329.
Orchard, the (monthly notes), 51, 116, 180, 243, 308, 372.
Orchard-sprays, application of: The stationary system, 321.

P.

Paint not drying, 126.
Pampas-grass, supplies of, 46.
Paspalum, surface sowing of, on burn, 382.
Pasture competition, the North Taranaki, 144.
Pastures, swamp, of the lower Waikato Basin, 129.
Paynter, L.—Citrus-culture (monthly notes), 51, 116, 180, 243, 308, 372.
Peach, aphides of, 26.
Pea, garden-, varieties, 32.
Perennial rye-grass in the soil and in the laboratory, the germination of, 224.
Pig-carcasses, some causes of rejection of, 209.
Pig industry, the prospective trend in the, 254.
Plum, aphides of, 26.
Poisoning, live-stock, in New Zealand, 43.
Potatoes, corticium-disease of, 287.
Potatoes, seed, certification of, 61, 109, 173.
Potatoes, the identification and purchase of certified seed, 107.
Potato-growing in New Zealand, 8, 77.
Poultry-keeping (monthly notes), 53, 118, 182, 246, 310, 374.
Preservation of silage, the, 139.
Prevention of mould-growth on box-timber, 22.
Prospective trend in the pig industry, the, 254.
Primrose, aphides of, 92.
Pumpkin, aphides of, 92.

R.

Recent amendments to dairying regulations under the Dairy Industry Act, 1908, 301.
Reid, W. D.—The preservation of silage, 139.
Reid, W. D., and Cottier, W.—Eelworm disease of chrysanthemums, 219.

S.

Seasonal notes, 47, 112, 175, 239, 304, 369.
Seed certification: Summary of operations for 1934–35, 283.
Seed, Chewings fescue, 40.
Seed potatoes, certification of, 61, 109, 173.
Seedless barberry in Southland, 190.
Seed-testing Station, the Official: Operations for year 1934, 329.
Sellwood, T. A.—Dry-dusting of cereals: An efficient home-constructed plant, 367.
Sheep, control measures against worms in, 101.
Sheep, foot troubles in, 190.
Sheep, the lime-requirements of, 139.
Silo, waste in concrete, 253.
Singleton, W. M.—Dairy-herd testing in New Zealand, 294.
Skin of heifers, treatment of growths on, 398.
Smallfield, P. W.—Farming in the Auckland Province, 1, 69, 334.

Small-seed industry in Otago and Southland, some aspects of, 290.
Soil analysis, the role of, 60.
Some aspects of the small-seed industry in Otago and Southland, 290.
Some causes of rejection of pig-carcasses, 209.
Sore-shin of blue lupins, 86.
Southland crop competitions: 1934–35 season, 165.
Southland, seedless barberry in, 190.
Staggers in live-stock, 18.
Storage of baled hay, 382.
Strawberry, aphides of, 92.
Stuart, A.—Southland crop competitions, 165.
Subterranean clover, Canterbury experience with, 167.
Subterranean clover, surface-sowing of, on burn, 382.
Supplies of pampas-grass, 46.
Surface-sowing of paspalum and subterranean clover on burn, 382.
Swamp-pastures of the Lower Waikato Basin, 129.
Swede and turnip varieties, 150, 201, 266.

T.

Tauranga, effect of liming lemon-trees at, 163.
Taylor, G. G.—Application of orchard-spray: The stationary system, 321.
Teat, treatment of lacerated, 382.
Tests for contamination of milk, 318.
Thomson, R.—Potato-growing in New Zealand, 8, 77.
Thrips: With special reference to the greenhouse thrips, 298.
Treatment of growths on skin of heifers, 318.
Turnip, aphides of, 92.
Turnip and swede varieties, 150, 201, 266.

W.

Wallace, J. O.—Some aspects of the small-seed industry in Otago and Southland, 290.
Waste in concrete silo, 253.
Weather records (monthly), 63, 127, 191, 255, 319, 383.
Wellington District farmers' field competitions: Season 1934–35, 354.
Wheat-grain for horses, 253.
White butterfly menace, the, 109.
White clover, cyanoglucosides in, 159.
Worms in sheep, control measures against, 101.
